The screenshot shows a web browser's developer console with the 'Console' tab selected. The console displays the following JavaScript code:

```
> var number = 5;
    const counter = 5;
    for (i = 1; i <= counter; i++){
      console.log ("^=.=^");
    }
```

Below the code, the output of the loop is shown as a list of five log entries, each containing the string `"^=.=^"`. The first entry is highlighted with a blue background and a circular icon containing the number 5. To the right of the log entries, the text `VM251:4` is visible. At the bottom of the console, the text `< undefined` is displayed, followed by a blue prompt character `>`.
